The profit on issue, payable quarterly, is at 3M Kibor + 300bps, maturing in Jan 2021. ▪ LPTL issued a TFC in January 2011 for PKR 1,649 mln. The profit on issue, payable quarterly, is at 3M Kibor + 300bps, maturing in January 2021 	<p>RATING RATIONALE</p> <p>Liberty Power Limited (LPTL) runs a 200MW power plant based on Residual Fuel Oil. The Company operates in the regulated power sector. It enjoys sovereign guarantee against receivables from power purchaser CPPA given adherence to agreed performance benchmarks. The Company's operations and maintenance operator, Wartsila Pakistan (WPK), is a key source of comfort in managing the plant's operations. The Company's financial risk profile is largely dependent on repayment behaviour of the power purchaser. Although capacity payments observed improvement, the Company's cash cycle has witnessed a surge on account of delayed energy payments by CPPA. The Company has been paying consistent dividends. Nevertheless, strong internal cash generation has helped it in managing its working capital requirements efficiently, while it significantly reduced its short-term borrowings. The Company, while managing its financial obligations, makes use of the cushion available from the lenders. The ratings draw comfort from the sponsors' demonstrated support to the Company.</p> <p>KEY RATING DRIVERS</p> <p>Upholding operational performance in line with agreed performance levels would remain a key rating driver. Improving, indeed aligning, the Company's repayment behaviour with its financial profile would be ratings positive. Meanwhile, any significant increase in overdue receivables, as a result of rise in circular debt, may impact the ratings, though this risk is expected to be curtailed on the back of CPEC and increased foreign investor involvement in Pakistan's power sector.</p>

But it does not mean that a rating change is inevitable. Rating Watch may carry designation – Positive (rating may be raised, negative (lowered), or developing (direction is unclear). A watch should be resolved within foreseeable future, but may continue if underlying circumstances are not settled.

Where the trends have conflicting elements, the outlook may be described as 'Developing'.
